

MFS – Modular Filter System

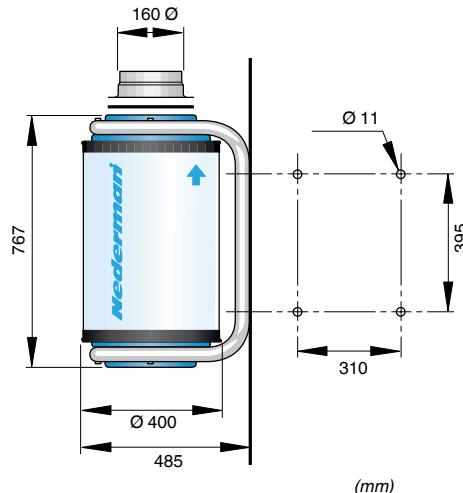

MFS offers maximum flexibility through its unique modular concept of standard mounting and filter elements. Virtually any combination can be achieved, from a single filter assembly, to larger multi-stage filter systems combining particle, HEPA and Gas. For filtration of both particles and gases, place the particle filter before the gas filter. To increase the total airflow capacity place further filter assemblies in parallel.

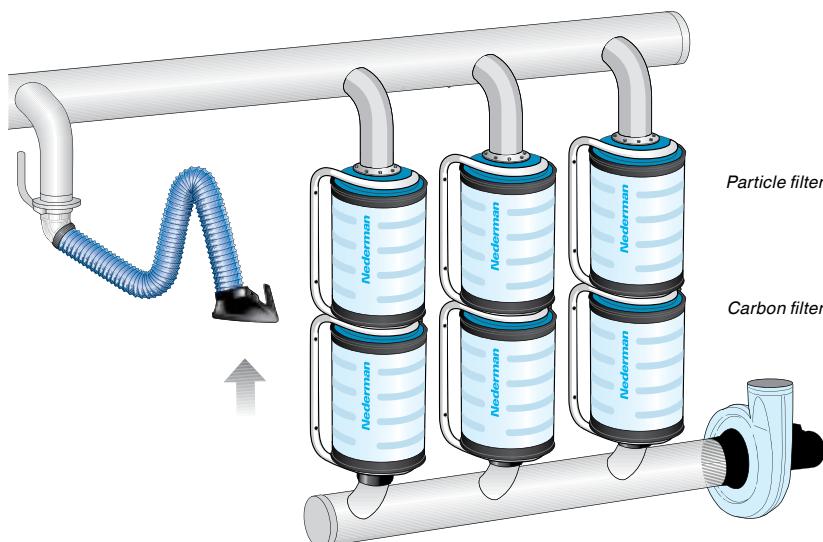

Applications: TIG and spot welding, laboratory extraction, food ingredients and odours, chemical handling etc.

- Few parts - easy installation
- Modular design - easy to expand the filter capacity
- Particle, HEPA and gas filters can be combined

Installation example

Product availability may differ by country

MFS with Particle filter

For welding smoke, dust and large particles. A complete filter unit includes filter cartridge, console and two connections.

MFS with Micro / HEPA filter

For ultra fine and contaminating particles. A complete filter unit includes filter cartridge, console and two connections.

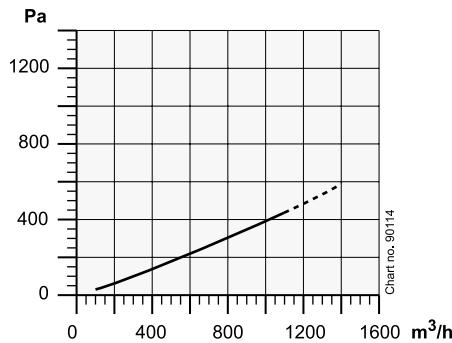

MFS with Gas / Carbon filter

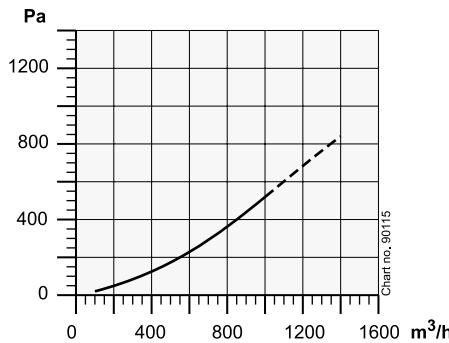

Absorbs smells, gases, smoke and organic solvents (toluene and methylethylketone). A complete filter unit includes filter cartridge, console and two connections.

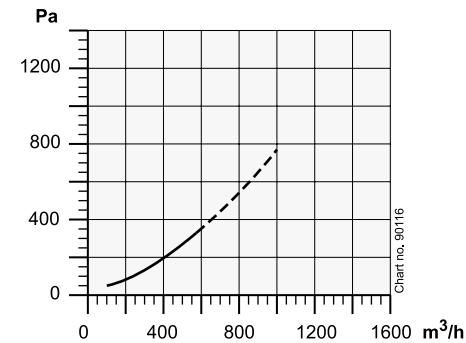

Pressure Drop

Pressure Drop

Pressure Drop

Part no.	12600144
Filter surface	18 m²
Filtration degree	99 %*
Weight	8.8 kg
Material cylinder	Cellulose paper
Material filter media	Cellulose paper, BIA Category M

Part no.	12600444
Filter surface	14 m²
Filtration efficiency	99,95 % *
Weight	6.4 kg
Material Cylinder	Cellulose paper
Material Filter media	Micro fibreglass

Part no.	12600544
Weight total	21 kg
Weight filtration media	15 kg
Material Cylinder	Cellulose paper
Material Filter media	Activated carbon

*) acc. to EN 1822, H 13

The flow of air should not exceed 500 m³/h per filter unit.
The lower the flow of air, the better the filtration ability/absorption.

Replacement filter	Part no.
Particle filter without console	12600711
Micro / HEPA filter without console	12603361
Gas filter without console	12603461

Accessory	Part no.
Console for MFS	12600644

Kit consists of	Part no.
Original arm 2 m + MFS filter unit with Particle filter (incl bracket) + fan N24, 3 phase, 230/400V, 50 Hz, 0.9 kW + Fan Control Manual	12610544
Original arm 4 m horizontal + MFS filter unit with Particle filter (incl bracket) + fan N24, 3 phase, 230/400V, 50 Hz, 0.9 kW + Fan Control Manual	12610644
